

## Technology Communication Log

This is a basic framework for how you should gather, collect and save your information. I would make a sheet such as this each day for each of the categories to track - texts, instant message, Twitter, email, Facebook (email, chat, status updates, comments), blog posts and comments . You'll notice I am not asking you to break down the number by individuals, simply aggregate your number each day.

Then you will write a daily journal (at least one page) and please make sure you follow the FINDINGS section of the rubric for what I am looking to see.

	IM	Email	Texts	Tweets
Friends				
Family				
School				
Professional				

**Final paper:** your final paper FINDINGS section should be an analysis of your daily journals -- the 7 you have written -- tightly summarized. Don't try to be smart. Just write about what you saw. I will be judging you based on your information gathering skills, your analytical skills and your writing skills.

To receive an A -- which is EXCELLENT -- you should make sure you go above and beyond the general requirements of the paper. Meeting minimum requirements means you have done AVERAGE work, which is a C. I am not expecting perfection. I am not expecting beauty. **I am expecting smart, hard work.**
